### *Breadth of experience rather than core terms*

Clinical Experiences will provide a more flexible prevocational training program, compared to previously mandated core terms.

- A: Care of patients presenting with undifferentiated illness.
- B: Chronic illness patient care.
- C: Acute and critical illness patient care.
- D: Pre-procedural/operative patient care

Clinical Experience categorisation is dependent on the model of care.

# Prevocational Year 2 - Ballarat

Pre Vocational Training
